## Hot topics

### **ISO for AFP Archive**

The AFP consortium is working on introducing AFP Archive to ISO through TC171 (where PDF/A was standardized). Current goal is to point to the IS/3 level plus some restrictions and including FOCA fonts and metadata (MOCA).

### **Preprinted forms overlays**

Work item. Define a new mixing rule to be able to simulate preprinted forms on white paper, without showing “white” and “Color of Medium” problems.

### **PDF compatibility**

Enhanced exception reporting to be able to identify PDF level compatibility problems.

# AFPC Interchange Set Definitions

**Subsets has been frozen since April 2010 vote.**

**Planned to be voted to final after spring 2011 meeting.**

- Validation tools and test cases are now available to Consortium members
- Validation process continues to be a self certification

**NO MEMBER CAN MAKE A VALID CLAIM OF IS/3 COMPLIANCE AT THIS TIME!**

**But maybe next month?**

## 2011 meeting schedule

- **February (Status meeting only)**  
Virtual meeting (Phone conference)
- **May (Week of May2-6)**  
Copenhagen (Skodsborg), hosted by MPI Tech
- **Interim vote for MOCA?**
- **Fall (Week after Graph Expo)**  
Boulder, hosted by InfoPrint
